EARBY URBAN DISTRICT COUNCIL.

REPORT

OF THE

MEDICAL OFFICER OF HEALTH,

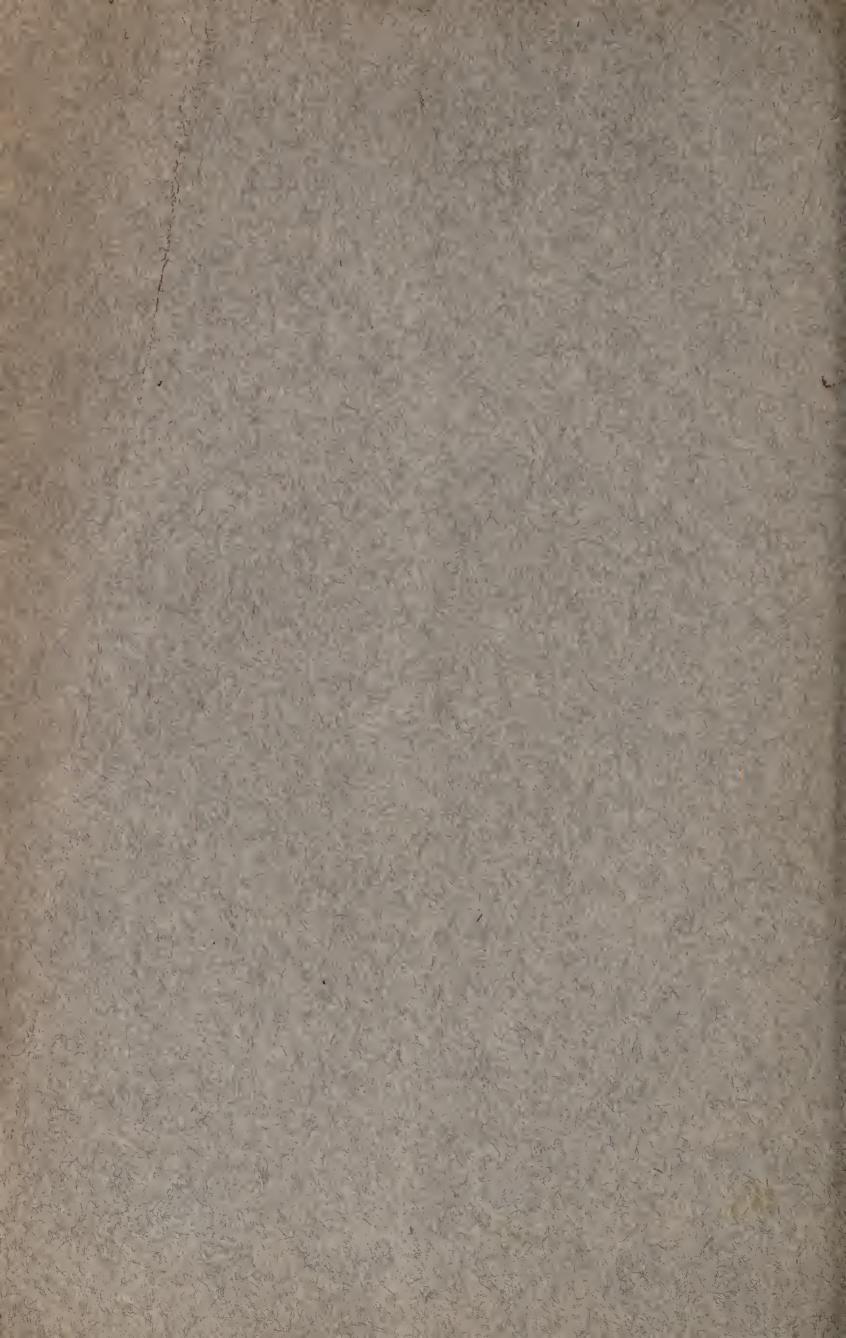

TOGETHER WITH THE

REPORT ON THE FACTORY ACT

From January 1st to December 31st, 1910.

EARBY-

Caxton Printing Works, Skipton Road, Earby,
—1911.—

EARBY URBAN DISTRICT COUNCIL.

REPORT

OF THE

MEDICAL OFFICER OF HEALTH

TOGETHER WITH THE

REPORT ON THE FACTORY ACT

From January 1st to December 31st, 1910.

EARBY-

Caxton Printing Works, Skipton Road, Earby,

URBAN DISTRICT OF EARBY.

Annual Report for the Year Ending, December 31st 1910, of the Medical Officer of Health and the Surveyor and Sanitary Inspector.

The Medical Officer of Health's Annual Report for the Year Ending December 31st, 1910.

To the Chairman and Members of the Council.

GENTLEMEN,

I have pleasure in presenting for your consideration my First Annual Report on the Health and Sanitary condition of the District.

I estimate the population of the township to be 6,000 to the middle of the year and on that figure I have calculated my statistics.

With the District being formed since the time of the last census the population estimate is necessarily guess work, but the census is to be taken again in April when the population will be definitely fixed. Since the middle of December and coinciding with increased prosperity in the cotton trade in the Lancashire towns, there has been a considerable and steady exodus of cotton operatives from the district, and I think that the census will be taken at a time when the population is somewhat under its normal condition.

The District has been divided into two localities, viz. of Earby and Kelbrook for statistical purposes. These localities differ slightly from each other in that Kelbrook is distinctly more rural in character.

THE AREA OF THE DISTRICT, &c.—The Area of the District is 3,293 acres; the sub-soil is of clay and consequently damp. The populous parts lie in a valley with hills on both sides and sloping gently in a northerly direction to the locality of Earby. These points make the drainage of Earby very complicated and explain to some extent the bad condition of the main roads throughout the district. The cultivated land is in pasturage and meadow, and the produce from it is milk, butter and eggs, which are sold mostly in Earby and Kelbrook—the remainder is sent by train to the towns in the neighbourhood.

WATER SUPPLY.—Water is derived from the uplands on the eastern side of the district, and during the year the companies have been able to have a plentiful supply so that no scarcity of water has been complained about. During the year houses at the top or Millbrow Road in Earby have been joined up to the mains and are now supplied with Company's water. The large storage reservoir of the Earby Company has been made practically watertight and I am led to believe that we will not be threatened with serious shortage in future.

There have been several h avy rainfalls during the year and I have observed at these times marked turbidity and deposit of solid material in the water. I have tested the water on two occasions and found the quality to be good, wholesome for drinking and excellent for domestic purposes. It has no action upon lead.

RAINFALL FOR 1910.

Total ... 41. 56 ins.

BIRTHS.—During the year there were 148 births—75 males and 73 females. Of these 8 were illegitimate—7 males and 1 female. This gives a birth rate of 24'6 per 1,000 population.

DEATHS.—The deaths registered in the district numbered 69, which gives an annual death rate of 11'5 per 1,000.

Deaths of residents which have occurred outside the district number 10, which added to the deaths registered in the district, gives a total of 79 deaths, a nett death rate of 13'1 per 1,000.

The following table shows the ages at which the deaths have occurred:—

Death	s under 1 year		20) 27 deaths under
,,	of 1 year and	under 5 years	7) 5 years.
,,	5 years	,, 15 ,,	3)
,,	15 ,,	,, 25 ,,	5 52 deaths over
,,	25 ,,	,, 65 ,,	25 5 years.
,,	65 years and u	ipwards	19)

I enclose a detailed list of the causes of death and the ages at which death occurred.

INFANTILE MORTALITY.—Twenty deaths under 1 year occurred, giving a rate to 1,000 births of 135. The causes of death in infants are:—

	Whooping Cough	Wasting Diseases	Bronchitis	Pneumonia	Other (auses
Under 1 month	• • •	3	φ φ φ		• • •
1 month and under 6 months	1	3	2	2	4
Over 6 months	1	2	1	1	
Totals	2	8	3	. 3	4

Details of the deaths of infants under one year can be got from table enclosed.

INFECTIOUS DISEASES.—There have been 102 cases of infectious diseases notified during the year:—Scarlet Fever 90 cases, Diphtheria 4 cases, Erysipelas 8 cases.

SCARLET FEVER.—There have been 3 distinct outbreaks during the year. In January an epidemic started in Kelbrook and necessitated closure of the school until the beginning of During closure the School was thoroughly cleaned disinfected. These precautions were in checking the epidemic. There was one death. Twentyeight cases in all occurred in Kelbrook and of these 13 were removed to Skipton Isolation Hospital. In Earby 62 cases were notified and 8 of these were isolated in Skipton Hospital. Two separate outbreaks were noted, one in the beginning of September, the other in the last few days of November. the latter all cases were scholars at New Road Council School, and on visiting the school I found two children peeling freely while in regular attendance at school. These I excluded from school and requested the teachers to be on the outlook for suspicious cases.

Since July all cases have been treated at home by inunction of Eucalyptus Oil, and swabbing infected throats with Carbolic Oil, and in order to get thoroughness in the treatment a trained nurse was engaged. The results from this treatment were so satisfactory that I advocate giving it an extended trial with the regular provision of the nurse which ensures thoroughness besides having a beneficial effect in educating the people to more sanitary methods and increased cleanliness in their homes.

DIPHTHERIA.—Four cases occurred with one death and one was removed to Skipton Isolation Hospital. I would call your attention to the Diphtheria Antitoxin Order, 1910, which permits a council having a regular supply of Antitoxin for use in urgent cases. In many cases patients are too poor to pay their medical attendant for supply of Antitoxin, and in such cases it is the moral duty of the authority to see that they have this essential part of the treatment.

ERYSIPELAS.—Eight cases were notified during the year and there were no deaths.

WHOOPING COUGH was prevalent during the early spring and accounted for 3 deaths—2 in infants under 1 year of age.

MEASLES AND GERMAN MEASLES.—A few cases of both occurred during the year and there were no deaths.

Phthisis.—Four deaths occurred from Pulmonary Tuberculosis during the year and there are at least other 4 cases in the district. These cases are not in a position to have proper treatment at home and are a distinct menace to others. Voluntary notification has not been a success and I should welcome a system of compulsory notification for a disease which causes more deaths than all other infectious diseases combined. No provision is made for open air treatment in the district and money would be wisely spent in providing shelters for Earby and Kelbrook. Suitable situations for such are known and could be procured easily.

Schools.—There is still overcrowding but the building of the new school on Alder Hill is proceeding and there are prospects of its being ready for opening in the early autumn. Medical inspection of the school children has been carried out by Dr. Hy. Stansfield for the West Riding County Council. I have visited the schools during his attendance and have discussed matters pertaining to the health of the scholars. Our relations have been in every way cordial and satisfactory.

SEWERAGE AND DRAINAGE.—The complete system of drainage for Earby and Kelbrook has been satisfactory and the effluent from the Sewerage Disposal Works has, in the majority of my visitations, been good. I consider, however, improvement would be obtained by laying three clinker beds beyond the sprinklers and running the effluent directly from them into the river, instead of at present running it over the large tract of land which is of little use for filtering and is very expensive in upkeep.

SEWER VENTILATION.—The trial Vertical Shaft put at the entrance to Kelbrook has been successful in abating the

nuisance of sewer gas in that region. Others might with advantage be fixed in different high regions of the system.

Improvement was obtained during the year by doing away with the Langroyd Road Cesspools. It is to be hoped that some scheme will be come at for removing the cesspool for Rushton Street. The ash-tip at Mill Brow is still in use and has proved satisfactory.

SCAVENGING has been carried out by the Contractors in a satisfactory manner and there have been no complaints in Earby and few in Kelbrook.

No. of loads of refuse removed by Contractors—Ashes, &c.—1,201 Earby, 252 Kelbrook; Night Soil—54 Earby, 41 Kelbrook.

The public streets have been in bad condition throughout the winter and great discomfort has been complained of by foot passengers owing to the very muddy condition and many accumulations of surface water.

Many back streets are unpaved and in a deplorable state, and several back yards are unpaved and kept in an insanitary condition by the householders who do not seem to realise that this is menacing to the health and conducive to dirty dwelling houses. These back streets and unpaved back yards require your attention.

Bakehouses and Slaughter Houses.—These have been visited periodically—the latter at times of slaughtering—and are mostly in good condition.

DAIRIES AND COWSHEDS have been inspected. Many of the cowsheds were found unsatisfactory—most were deficient in air space while ventilation, lighting and drainage were primitive and insufficient in several. These visitations are unavailing unless some definite regulations are made. This requires your early attention.

OFFENSIVE TRADES.—There is only one, that of a tripe dresser and fat boiler combined. Several inspections were made and the premises were found in good condition.

I have sent monthly returns of infectious diseases to the West Riding County Council and quarterly reports to your Council.

Dr. J. Spencer Low, Inspector for the Local Government Board, visited our district in February and made several observations as to improvement. These were noted and followed out as far as practicable.

During the year I have made systematic inspections of the district.

I am, gentlemen,

Your obedient servant,

ALEXANDER FALCONER.

February 10th, 1911.

TABLE C. 1910.

EARBY SANITARY DISTRICT.

WATER SUPPLY—Any development during 1910—Extension of mains.

Development still needed—Better filtration. Any complaints as to (a) insufficiency—No.

(b) unsatisfactory quality—Very few.

(c) plumbo solvent action—No.

Sewerage—Developments during 1910—Extension at Green End, abolishing 3 Cesspools and to Kelbrook Vicarage. Developments still needed—Green End.

SEWAGE DISPOSAL—Any complaints as to out fall-works—No.

Scavenging—Any inadequacy, and where—No.

Bye-Laws and Regulations—Any adopted or sanctioned during 1910—None.

ADOPTIVE ACTS—Any step; taken for the consideration, or application of:—

(a) Notification of Births Act, 1907—No.

(b) Public Health Acts Amendment Act 1907—No.

(c) Other Adoptive Acts—Private Street Works Act 1892; Public Health Acts Amendment Act, 1890, Part 3.

Regulated Buildings, Trades, &c.	No. in District.	No, on Register	Total No. of Inspections made.	General Condition.	Proceedings (if any),
Common Lodging Houses Canal Boats Slaughter Houses Cowsheds Milk Purveyors Offensive Trades		4 16 Not yet	22 46 regis'd	Moderate. 2 Unsatisfactory Newly started business Good.	A

Cowsheds.—Any special inspection made during 1910—Yes, all measurements taken.

What arrangement for Veterinary Inspection of Dairy Cows—None.

INFECTIOUS DISEASE—Any suspected spread by rats, dogs, cats, fowls, flies or fleas—No.

What arrangements for supply of Antitoxin—None.

Isolation Hospital—Any observation on adequacy or efficiency—None provided.

Schools—Any investigations undertaken by M.O.H.—Yes.

Prevention of Consumption—What system of notification? Voluntary. Its success—Useless.

What arrangement for treatment of Patients on sanatorium lines?—None.

Any Sanitary Inspection of Patients' Houses—Yes. Any Disinfection of ditto—Yes.

Any Distribution of Advice—No. Any Action re Spitting—No.

Any Disinfection of public rooms, vehicles, etc.—No.

Housing, Town Planning, Etc., Act—No. of houses inspected during 1910—None.

Is house-to-house inspection systematically made—No.

Are records kept in accordance with the "Housing (Inspection of District) Regulations, 1910"—No.

Are there any working-class dwellings crected by the Sanitary Authority?—No.

Any special activity in house building ?—No.

No. of new houses built during 1910—45. General character—Cottage and better class artisan.

INFANTILE MORTALITY—What organised effort to control it? None.

Is Health Visitor appointed by S.A.?—No. By other body?—No.

Nuisances—Total No. of Nuisances in hand at close of 1909—None. At close of 1910—8.

Reported during 1910—53. Abated during 1910—45.

Total No. of Legal Notices served for Abatement of Nuisances during 1910—20.

Total No. of Summonses or other Legal Proceedings-Nil.

No. of Sink wastes disconnected during 1910—55. Trapped —55.

No. of Closets newly constructed during 1910—57. Kinds W. W.C. and W.C.

No. of Closets reconstructed—3. Kinds—Pails.

MISCELLANEOUS-Rainfall 41.56ins.

What mortuary accommodation (a) for accidents, etc—None; (b) for infectious cases—None.

No. of Burial Grounds—2; any need for extensions—No.

Seizures of Unsound Food—None.

No. of Samples of Food and Drugs analysed in 1910-None.

No. of Smoke observations taken—7. Legal Notices none. Summonses—None.

BIRTHS during 1910—Males 75; Females 73; Total 148. Number of illegitimate, included in above—8; number of Still Births (not included)—11.

DEATHS during 1910—(1) Gross Deaths, i.e., total actually registered in the district, without any correction 69; (2) Nett Deaths, on which the rates are calculated—Males 38; Females 41; 79. Number uncertified, included in the above—None.

SANITARY REQUIREMENTS OF DISTRICT, AND SUGGESTIONS OF MEDICAL OFFICER OF HEALTH.—Regulations for Cow Sheds. Paving of Back Yards. Abolishing Cesspools in populous districts.
